OIL & GAS
JOURNAL
ENERGY DATABASE

Energy Statistics Sourcebook

6th Edition

Incorporating data through 1990

Oil & Gas Journal is the weekly news magazine!

Or, is it a technical magazine?

Some people can't make up their minds.

OIL & GAS JOURNAL

OIL & GAS JOURNAL

And it's easy to understand why. It's both!

Almost everyone agrees that the Journal is the uncontested news source for the petroleum industry — in all phases of the industry worldwide.

But what about technical information? The Journal is the leader there,too. Look at the facts.

How many technical pages on refining, petrochemical and gas processing did the leading magazines publish in 1990?

Oil & Gas Journal	515 pages
Second processing magazine	314 pages
Third processing magazine	70 pages

How many on drilling and production?

Oil & Gas Journal	726 pages
Second Drilling & Production Magazine	393 pages
Third Drilling & Production Magazine	254 pages

How many on pipelining?

Oil & Gas Journal	286 pages
Second Pipeline Magazine	284 pages
Third Pipeline Magazine	123 pages

In all, the Journal published 1,582 technical pages in 1990. That's almost four times the number published by the next leading petroleum magazine.

What about abstracts?

The abstracting of magazine articles as reference material is a strong indication of the technical value of those articles. In 1990 the American Petroleum Institute's abstracting service selected petroleum/processing articles from these leading magazines:

Oil & Gas Journal	878 articles
Second Processing Magazine	741 articles
Third Processing Magazine	211 articles
Fourth Processing Magazine	177 articles

In 1990, The University of Tulsa's abstracting service selected **drilling and production** articles from these leading magazines:

Oil & Gas Journal	266 articles
Second Drilling & Production Magazine	76 articles
Third Drilling & Production Magazine	60 articles

OIL & GAS JOURNAL

What do "technical" oil people say?

Look at the readership study conducted by Erdos & Morgan/MPG, independent market research firm in New York City. A mailed questionnaire asked the customers of petroleum equipment firms, "Which magazines pertaining to your work do you read regularly?" Here's what the "technical" respondents said:

In Drilling and Producing

Oil & Gas Journal	443
Second Drilling & Production Magazine	300
Third Drilling & Production Magazine	282
Fourth Drilling & Production Magazine	223

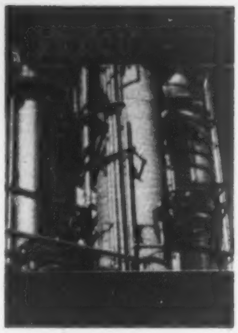
In Processing

Oil & Gas Journal	281
Second Processing Magazine	151
Third Processing Magazine	111

In Pipelines and Transportation

Oil & Gas Journal	144
Second Pipeline Magazine	63
Third Pipeline Magazine	45

OIL & GAS JOURNAL



The facts speak for themselves. If you need petroleum industry news and technical information to help you on your job, your first choice is clear: Oil & Gas Journal. The Journal gives you what you need every week, 52 weeks a year.

If you don't have a personal subscription to the Journal, isn't it time you did? Use the convenient subscription card in this issue. If the card is missing, call, write or fax the Circulation Services Department, (800) 633-1656, Fax (918) 831-9497. Oil & Gas Journal, P.O. Box 2002, Tulsa, OK 74101, U.S.A.

OIL&GAS
JOURNAL

There's No Other Energy Source Like It.

Energy Statistics Sourcebook

Sixth Edition

Published in October, 1991, by PennWell Publishing Company, publishers of the *Oil & Gas Journal*; *Offshore Incorporating the Oilman*; *Oil, Gas & Petrochem Equipment*; *Ocean Oil Weekly Report*; **International Petroleum Encyclopedia**; *Electric Light & Power*; *Power Engineering.*

Energy Statistics Sourcebook
Available on Diskettes
For Personal Computers

In order to assist industry analysts the Oil & Gas Journal Energy Database is making the tables from this edition of the Energy Statistics Sourcebook available on diskettes for use with IBM or compatible personal computers.

Since many analysts will want to use the data from the Sourcebook in spreadsheets or other PC software, we are offering these diskettes as an alternative to tedious, time-consuming manual data entry. By purchasing the data in Lotus 1-2-3 (TM) worksheets, it can be readily accessed and used for analysis. Tables can be purchased individually, by the chapter, or for the entire publication. A separate grouping of all of the tables containing international data is also available.

Individual tables -- $25 each, minimum order $50

Chapters:

Exploration & Drilling	$275
Production	$125
Reserves	$125
Refining	$250
Stocks	$125
Imports & Exports	$250
Demand	$250
Natural Gas	$150
Price	$275
Revenues & Expenditures	$ 75
Offshore	$150
Transportation	$ 75
Energy	$175
Other	$ 75
Tables for entire Sourcebook	**$1,195**

The data are stored in tables as they appear in the Sourcebook. Tables which cover several pages in the Sourcebook are included in a single file on the diskette. **All tables are stored in Lotus 1-2-3 (TM) Version 2 worksheets on 5 1/4" or 3 1/2" DS,DD** diskettes. When ordering, please specify the diskette size. If not specified, 5 1/4" will be assumed. Purchasers must have their own copy of Lotus 1-2-3 to use these data diskettes. All worksheets will contain exactly the data printed in the Sourcebook -- the data will not be updated.

To order tables from the Energy Statistics Sourcebook or other products from Oil & Gas Journal Energy Database, please call **(918) 832-9346 or fax (918) 831-9555.**

Call our OGJ Energy Database
Research Service Hot-Line

If your research needs are sporadic and usually on a tight deadline, one call to the research consultants at the Oil & Gas Journal Energy Database may be all the help you need. Our consultants can produce customized reports on request, whether it's one statistic or hundreds, and send it to you on diskette or as a printout, and in some cases, can fax it to you.

The price per series is a reasonable $25.00 no matter the time span you request, and volume discounts are available for orders of more than just a few series. There is a $50.00 minimum charge per order, and if your deadline is extremely short, same day service is available in most cases for an additional $25.00 per order (overnight delivery charges may apply).

Oil & Gas Journal Energy Database

Energy Statistics Sourcebook

Introduction

The energy industry, and particularly the oil and gas segment, is in an unprecedented period of volatility. Within the last 15 years the industry has moved through both a period of record highs, and a period of record or near record lows. There are few, if any, signs of an end to the volatility.

With all of these changes taking place, making intelligent and profitable decisions in today's energy industry requires careful evaluation of the recent past. This requires access to a substantial amount of statistical data describing industry activities.

This Energy Statistics Sourcebook has been designed to provide the basic key statistics necessary for oil and gas industry analysis in one convenient publication. Not only to provide the key statistics necessary, but to provide them for a sufficient time period and in sufficient detail for conducting all types of analysis. In addition to providing annual data for all of the time series, the Sourcebook provides monthly data for much of the information. The monthly data enables the analyst to study seasonal patterns and to more accurately examine cyclical patterns. It also enables analysts to experiment with lead/lag relationships between time series or to test the relationship or correlation among various series. For most time series at least ten years of data have been provided, and the data extend through the last complete year of statistical information -- 1990.

For each industry segment the essential series necessary for analysis have been selected and presented by the economics staff of the Oil & Gas Journal. The selection of data is based on their years of experience in working with and collecting statistical information on the oil and gas industry. These are the key series for each industry sector selected from the 60,000 time series contained in the Oil & Gas Journal Energy Database. This database is the largest, most comprehensive, on-line database available for the oil, gas and energy industries. It would be impossible to capture the entire database library in a convenient printed publication. So this carefully selected compendium of key series has been developed for your convenience. You will find it an extremely useful tool for analysis and understanding of trends in the industry.

The statistical tables have been grouped into chapters. Each chapter describes a major sector of the industry. As an added feature, the Oil & Gas Journal economics staff has provided graphic presentations of key series. These graphs give a vivid picture of the changes that have occurred in the industry in recent years. The charts illustrate additional ways that the statistics in the Sourcebook can be used for analysis.

All of these features have been designed to provide you with an easy to use book for industry analysis and source for energy statistics -- the Energy Statistics Sourcebook from Oil & Gas Journal Energy Database.

Keep it on your desk within easy reach and you will soon find it a valuable aid in your analysis of the industry.

BESTSELLER

Top Companies of the U.S. Oil & Gas Industry, 1981-90

Detailed financial and operating data on more than 65 of the largest U.S. based oil and gas companies with historical data for over 30 "predecessor" companies. Over 150 data items have been collected and more than 40 performance ratios have been calculated. Available in Lotus v. 2.0 only.

E1031-91 Top Companies, 1981-90 Data
$995.00 U.S. & Canada - $1,325.00 Export
Call for a complete list of the companies and data items included.

NEW DATA

BESTSELLER

1991 OGJ300

Oil & Gas Journal's listing of the largest 300 publicly-traded oil and gas companies with reserves in the U.S. is the source for this popular diskette. The OGJ300 contains all new data for fiscal years 1989 and 1990. Data items include current assets and liabilities, oil and gas sales, oil and gas assets, capital and exploratory expenditures, long-term debt, stockholders' equity, U.S. and worldwide liquids and natural gas production, reserves, net wells drilled, and much more. 640K RAM minimum required.

E1054-91 OGJ300, 1989-90 Data
$300.00 U.S. & Canada - $400.00 Export
(Available Late September 1991)

1991 OGJ100 International

The OGJ100 Intl. can help you identify the largest non-U.S. oil and gas companies and provide you with the basic financial and operating data on each one. This diskette contains all new data for fiscal years 1989 and 1990 and includes country, company name, total assets, total revenue, total net income, capital expenditures, and worldwide oil and natural gas production and reserves. A mailing list containing the company names and mailing addresses is also provided in both a printed form and as an ASCII delimited file.
E1211-91 OGJ100 Intl., 1989-90 Data
$100.00 U.S. & Canada - $135.00 Export

(Available Late September 1991)

Purchase both the OGJ300 and OGJ100 Intl. diskettes and save!

E1212-91 OGJ300/OGJ100 Intl., 1989-90 Data
$350.00 U.S. & Canada - $465.00 Export
(Available Late September 1991)

Survey of Forecasters, Spring 1991

Oil & Gas Journal Energy Database has surveyed over 25 oil companies, financial firms and others to obtain their oil industry forecasts through the year 2000 and beyond. Included are forecasts on drilling activity, production, imports, demand, prices and natural gas. Individual forecasts are provided but most companies are identified by pseudonyms. Most forecasts were made late Spring 1991. Data are presented by topic. Available in Lotus v. 2.0 only.

E1046-S91 Survey of Forecasters, Spring 1991

NEW

1991 OGJ300 Analyst

Ever wish there was a program that let you analyze any company or group of companies you wanted; or view in one convenient screen operating data, financial data, key ratios vs. industry ratios, graphs, key personnel, growth or changes over the most recent two years; and that you didn't have to learn because it ran in Lotus 1-2-3, and was so completely menu driven all you had to do was retrieve it and respond to prompts? Wish no more...The OGJ300 Analyst lets you do all of the above and more; it lets you select or sort companies by any of 38 criteria, add new companies for analysis, graph key ratios, print mailing labels of key personnel or your own customized reports...all in one or two keystrokes. The OGJ300 Analyst utilizes all the data in the 1991 OGJ300 and OGJ300 mailing list. Available in Lotus v. 2.0 only. 640K RAM minimum required.

OGJ300 Mailing List

Oil & Gas Journal's OGJ300 report on the largest publicly held oil and gas companies has always generated requests for a mailing list of the companies included. We are now making such a list available in two formats, printed copy or diskette, to suit almost any need. The printed version lists the company names, addresses and phone numbers. The diskette version is in a comma separated, double quote delimited ASCII text file. It includes the company names, addresses and phone numbers, plus, the names and titles of the person serving as President and Chief Financial Officer. Where no name is available, the field has been left blank to allow you to input an appropriate title. The ASCII format is compatible with most word processing packages.

* Brunei includes Malaysia through 1975.
+ Yugoslavia included in Other E. Europe & U.S.S.R.
@ Data before 1991 includes reserves that were previously classified as Other Communist or Total Communist. Since historical data were not available by individual countries, they could not be listed in their appropriate regions.

Appendix 1

Chronology of Major Events Affecting Oil & Gas Industry

1859
Colonel Edwin Drake discovers oil in Venango County, Pennsylvania at a depth of 69-1/2 ft.

1866
First oilwell drilled in Texas in Nacogdoches County.

April 1897
Nellie Johnstone No. 1 completed to become first commercial oilwell in Oklahoma.

1901
Discovery of Spindletop field in Texas. Drilling mud was used for the first time in the drilling of Spindletop wells. Price of oil falls dramatically.

1901
First oil production in Louisiana from Heywood Brothers No. 1 Jennings in Acadia Parish.

1905
Glenn Pool field discovered near Tulsa, Oklahoma.

1908
First oil production in the Middle East at Masjid-i Suleiman, Iran.

1911
Sherman Anti-Trust legislation is used as basis for breaking up Standard Oil Trust.

1919
American Petroleum Institute (API) founded.

October 1930
No. 3 Daisy Bradford well discovers East Texas field.

1936
First recorded crude oil production in Saudi Arabia.

1938
Mexico nationalizes foreign oil companies.

1938
Natural Gas Act allows Federal Power Commission to regulate pipelines.

1946
First recorded crude oil production in Kuwait.

December 1955
U.S. rig count reaches 3,137, a record which would remain unbroken until 1980.

1958
First commercial crude oil production in Alaska.

1960
Organization of Petroleum Exporting Countries (OPEC) is formed.

November 1964
U.K. grants licenses for exploration in the North Sea.

August 1970
West Ekofisk oil field discovered in Norwegian North Sea.

Appendix 1 (Continued)

August 1972
Brent oil field discovered in U.K. North Sea.

October 1973
OPEC increases prices by around 70%. Arab members of OPEC cut production and announce embargo on sales to the U.S.

1974
OPEC crude postings increase by up to 130%.

January 1974
Construction permit for Alaskan pipeline issued.

March 1974
Embargo on oil sales to U.S. lifted.

April 1974
Bertha Rogers No. 1 is completed near Washita, Oklahoma. At 31,441 feet it is the deepest well drilled in the U.S.

November 1974
International Energy Agency is formed.

1975
OPEC increases marker crude postings by 10%.

May 1975
Announcement of discovery of Brae field in U.K. North Sea.

September 1975
IEA member nations agree to increase emergency oil stocks to 70 day's supply from the previous level of 60 day's supply.

December 1975
Authorization of construction and filling of Strategic Petroleum Reserve.

February 1976
Design and implementation of two-tier pricing system for U.S. crude oil.

January 1977
Saudi Arabia and UAE increase prices by 5% while all other OPEC members increase prices by 10%.

August 1977
Start of North Slope production in Alaska.

October 1977
First crude oil imported for the Strategic Petroleum Reserve.

1978
U.S. demand peaks at 18.847 million b/d.

October 1978
Iran's production levels are disrupted by internal political difficulties.

November 1978
Natural Gas Policy Act (NGPA) places controls on natural gas prices and gives Federal Energy Regulatory Commission (FERC) authority over intrastate as well as interstate gas production.

Appendix 1 (Continued)

1979
World oil demand peaks at 41.6 million b/d.

May 1979
Gasoline shortages and rationing in the U.S.

November 1979
Official price of Saudi Light crude oil reaches $24/bbl.

April 1980
President Carter signs the "Windfall Profits" tax bill.

May 1980
Saudi Arabia increases price of Arabian Light to $28/bbl. retroactive to April 1st.

June 1980
OPEC meeting establishes a $32/bbl. benchmark price with a maximum price of $37/bbl.

September 1980
Iran-Iraq war disrupts production in both countries.

December 1980
OPEC meeting raises maximum price to $41/bbl. Saudi Arabia raises price for Arabian Light to $32/bbl. retroactive to November 1st.

January 1981
President Reagan lifts remaining price controls from domestic crude oil.

March 1981
U.S. crude oil wellhead price peaks at $34.70/bbl.

May 1981
OPEC decides to maintain current price levels but most countries agree to cut production by 10% to firm prices which had begun to slide.

October 1981
OPEC set crude oil marker price at $34/bbl. Saudi Arabia put production ceiling of 8.5 million b/d on Aramco crude.

December 1981
U.S. rig count peaks at 4,530 active rigs.

March 1982
OPEC imposes a crude oil production ceiling of 17.5 million b/d in effort to firm falling prices.

December 1982
OPEC agrees to an 18.5 million b/d production ceiling for 1983.

February 1983
OPEC reduces production ceiling to 17.5 million b/d. Marker crude price is reduced to $29/bbl.

October 1984
OPEC cuts production ceiling to 16.0 million b/d. Marker crude remains at $29/bbl.

January 1985
Saudi Light price reduced to $28/bbl.

Appendix 1 (Continued)

January 1985
Many U.S. natural gas prices are decontrolled. "Old" gas remains under price controls.

March 1985
U.K. coal miners strike. Strike has serious effect on European energy demand.

December 1985
OPEC changes policy and decides to secure market share rather than support price.

July 1986
Average U.S. crude oil wellhead price bottoms out at $9.39/bbl., the lowest price since November 1978.

July 1986
Posted price for West Texas Intermediate hits a low of $12.25/bbl.

July 1986
U.S. rig count reaches a new post-war low of 663.

September 1986
Prices begin to firm after OPEC agrees to an informal quota system for production.

December 1986
U.S. crude oil production falls to 8.35 million b/d, the lowest figure since 1977.

December 1986
OPEC agrees to a formal quota of 15.8 million b/d for the first half of 1987.

July 1987
OPEC revises their crude oil production quota upward to 16,600 b/d.

August 1987
Posted price for West Texas Intermediate rebounds to $20 bbl. for a short period before falling off again.

August 1988
Cease-fire between Iran and Iraq.

October 1988
Average price for world export crudes falls to $10.13/bbl.

November 1988
OPEC adopts new production quota of 18.5 million b/d for first half of 1989.

1988
U.S. imports of crude oil and petroleum products reach the highest level since 1979, 7.351 million b/d.

March 1989
Oil tanker Exxon Valdez runs aground off Alaska causing U.S. largest oil spill.

July 1989
OPEC boosts production quota to 19.5 million b/d.

October 1989
OPEC raises production quota again to 20.5 million b/d.

1989
Average price of world export crude oil moves up to 20.7% to average $16.65/bbl for the year.

Appendix 1 (Continued)

1989
OPEC production moves up to an average 22.048 million b/d, the highest level since 1981.

1989
U.S. crude oil production falls to 7.613 million b/d, the lowest level since 1963.

January 1990
OPEC raises production quota to 22.1 million b/d.

July 1990
OPEC raises production quota again to 22.5 million b/d.

August 1990
Iraq invades Kuwait. UN puts embargo on oil exports from Iraq and Kuwait.

October 1990
Spot price for West Texas Intermediate hits $36.09/bbl.

December 1990
Saudi Arabia boosts production to 8.3 million b/d to make up for lost output from Iraq and Kuwait.

Appendix 2

Glossary of Abbreviations and Terms

AAPG
American Association of Petroleum Geologists

AGA
American Gas Association

AOSC
Association of Oilwell Servicing Contractors

API
American Petroleum Institute

As Completed
A term used to describe recording of well completion data by the American Petroleum Institute. As completed indicates that when a well is reported it is added back into the total for the month in which it was actually completed. Thus, historical data will be more accurate as a measure of wells drilled, but recent time periods will be subject to constant revision as additional wells are reported and placed into the time period (month or year) in which they were actually completed. API started reporting wells on an as completed basis in January 1985. They developed historical information for 1970–1984 on an as completed basis.

As Reported
A term used to describe recording of well completion data by the American Petroleum Institute. As reported indicates that wells are shown as completions in the month they were reported to the API regardless of when the well was actually drilled and completed. The wells were most likely drilled and completed in the prior 4–6 month period. Until January 1985, all data on well completions from the API was on an as reported basis.

Baker Hughes
Baker Hughes Incorporated

Bbl
Barrel. A barrel is equivalent to 42 U.S. gallons.

Bcf
Billion cubic feet

B/d
Barrels per day

BLS
Bureau of Labor Statistics of the Department of Commerce

BOM
Bureau of Mines. The Bureau of Mines was responsible for all oil and gas reporting in the U.S. prior to the formation of the Energy Information Administration.

BP
British Petroleum

BTU
British Thermal Unit, a generalized measure of heating value.

Crude Oil & Condensate
In this publication, crude oil is used to refer to crude oil and condensate unless otherwise noted. Traditionally condensate is separated from the gas at the wellhead and added to the crude stream or accounted for similar to crude oil.

Appendix 2 (Continued)

Distillate fuel oil
Light fuel oil products, generally No. 2 and No. 4 fuel oils. May include diesel fuel.

EIA
Energy Information Administration of the Department of Energy

IADC
International Association of Drilling Contractors

IEA
International Energy Agency. See list of member nations in Appendix 3.

IPAA
Independent Petroleum Association of America

JAS
Joint Association Survey on Drilling Costs, compiled and published by the American Petroleum Institute, the Independent Petroleum Association of America, and the Mid-Continent Oil & Gas Association.

Jet Kerosine
Kerosine type jet fuel.

Jet Naphtha
Naptha type jet fuel. The primary user of jet naphtha is the U.S. military. Commercial jets generally use kerosine type jet fuel.

Kwh
Kilowatt hour

LNG
Liquified natural gas. Natural gas which has been converted to liquid form for transportation and sale.

LPG
Liquified petroleum gases, which generally include butane, propane, isobutane, and ethane. The term LPG & Ethane is sometimes used since ethane statistics used to be reported separately from other LPG products in U.S. government publications.

MAFLA
The area of the Gulf of Mexico offshore from Mississippi, Alabama, and Florida.

Mcf and Mmcf
Thousand cubic feet and million cubic feet

Mill
Million

MMS
Minerals Management Service of the Department of Interior

NGL
Natural gas liquids. The liquid products which are produced with and from natural gas.

North Slope
Refers to the northern area of Alaska. In general, North Slope refers to crude oil produced from Prudhoe Bay, Kuparuk and other developments in that area of northern Alaska.

NSWA
National Stripper Well Association

Appendix 2 (Continued)

OECD
Organization for Economic Cooperation and Development. See list of member nations in Appendix 3.

OGJ
Oil & Gas Journal

OAPEC
Organization of Arab Petroleum Exporting Countries.

OPEC
Organization of Petroleum Exporting Countries. See list of member nations in Appendix 3.

OCS
Outer Continental Shelf

PAD
Petroleum Allocation for Defense. A notation which divides the U.S. into 5 districts. Used as geographic reporting entities by the Energy Information Administration and others.

Processing Gain
The increase in total product volume after the refining process. As crude oil is processed into various products, the total volume in terms of barrels is increased (or decreased) depending upon the mix of products produced. In recent years, refinery processing gain has been growing due to the increasing quantities of light products produced.

Quads
Quadrillion BTU's

Residual fuel oil
Heavy fuel oil products, generally No. 5 and No. 6 fuel oils.

SEG
Society of Exploration Geophysicists

SII
Smith International Inc.

SPR
Strategic Petroleum Reserve

Stripper wells
Wells which produced less than 10 bbl. of oil per day.

Tcf
Trillion cubic feet

Ton
Metric ton

Total Liquids
A term used to indicate all liquids produced in the oil field including crude oil, condensate, natural gas liquids, other hydrocarbons and alcohol, pentanes and small amounts of natural petroleum products. Does not include water.

Wellhead revenues
The total dollar value of crude oil and natural gas at the wellhead. Wellhead revenues are calculated based on the production volumes of crude oil and natural gas multiplied by their respective average wellhead price.

Appendix 3

Organization of Petroleum Exporting Countries - OPEC

Member Nations (Year of Entry)

Algeria (1967)

Ecuador (1973)

Gabon (1973)

Indonesia (1962)

Iran (1960)

Iraq (1960)

Kuwait (1960)

Libya (1962)

Neutral Zone* (1960)

Nigeria (1971)

Qatar (1961)

Saudi Arabia (1960)

United Arab Emirates (1974):
- Abu Dhabi (1967)
- Dubai
- Ra's al Kaymah
- Sharjah

Venezuela (1960)

---

* Production from the Neutral Zone is shared equally by Saudi Arabia and Kuwait.

Appendix 4

Approximate Conversion Factors

For crude oil:

Multiply by

From: / Into:	Tonnes	Long tons	Short tons	Barrels	Kilolitres (cu. metres)	1000 gal. (Imperial)	1000 gal. (U.S.)
Tonnes	1	0.984	1.102	7.33	1.16	0.256	0.308
Long tons	1.016	1	1.120	7.45	1.18	0.261	0.313
Short tons	0.907	0.893	1	6.65	1.05	0.233	0.279
Barrels	0.136	0.134	0.150	1	0.159	0.035	0.042
Kilolitres (cubic metres)	0.863	0.849	0.951	6.29	1	0.159	0.035
1000 gallons (Imp.)	3.91	3.83	4.29	28.6	4.55	1	1.201
1000 gallons (U.S.)	3.25	3.19	3.58	23.8	3.79	0.833	1

For crude oil and products:

Multiply by

To convert:	Barrels to Tonnes	Tonnes to Barrels	B/D to T/Y	T/Y to B/D
Crude oil	0.136	7.33	49.8	0.0201
Motor spirit	0.118	8.45	43.2	0.0232
Kerosine	0.128	7.80	46.8	0.0214
Gas oil/diesel	0.133	7.50	48.7	0.0205
Fuel oil	0.149	6.70	54.5	0.0184

Weight conversions:

1 metric ton = 1,000 kilograms
1 metric ton = 2204.62 pounds
1 long ton = 2240 pounds
1 short ton = 2000 pounds

Volume:

1 barrel = 42 U.S. gallons
1 cubic foot = 0.0283 cubic metres
1 cubic metre = 35.315 cubic feet

1 barrel of crude oil (equivalent) = 5642 cubic feet of natural gas

Appendix 4 (Continued)

CASS (Comparative Analysis System Software)

Introducing a new dimension in comparative analysis! **Comparative Analysis System Software** takes you to the zenith in graphics capabilities!!! With Top Companies of the U.S. Oil & Gas Industry, OGJ300 Historical, and the Electric Utility CASS-PAKS you can instantly visualize how a company rates in the volatile world of business. This micro-computer based graphics software is designed for all levels of computer literacy. With an extensive network of pull-down menus throughout the program you can't go wrong! Anyone, ranging from the newest graduate to the president of the company, will find this an invaluable analytical tool. No more pouring over reports trying to get a mental picture of your company's place in the industry. The use of automatically generated graphs helps users spot trends, strengths, weaknesses or areas of opportunity. By defining your own comparative screening group, you decide the companies in the CASS-PAK you want to analyze. Add your own company or input your own data for an individualized look at the industry. You can choose the type of graph, time frame, colors, graph size, and a number of other options in order to customize these graphs to fit your personal needs. With the ability to see up to 24 graphs at one time, comparison graphs show you the screening groups' average, minimum, and maximum and how your company fares on the factors you choose — all this at the touch of a button! You can also choose from a variety of line graphs, bar charts, and pie charts to view the information you need. Any graph that can be displayed may be printed on over 40 different brand name printers. Dot matrix, laser or color printers will produce a hard copy of any graph you want. Not only can you print any data needed, you can also make spreadsheets or ASCII files. This data may then be analyzed with other products such as Lotus 1-2-3 or Harvard Graphics. To get a first hand look at how this graphics software can change the way you see the industry, **call now for a free CASS demo diskette!!!** Requirements: IBM computer or compatible, 512K RAM memory, hard disk, and EGA graphics board with 256K of graphics board memory.*

E9000 Comparative Analysis System Software
$2,995.00 U.S. & Canada - $3,984.00 Export
Not available to resellers.

*CASS will automatically take advantage of any advanced equipment such as VGA graphics boards, math co-processors, extended memory, expanded memory, color monitors or faster CPU's such as 80386 or 80486 computers.

Top Companies of the U.S. Oil & Gas Industry, 1981-90 CASS-PAK

Financial and operating data on more than 65 of the largest U.S. based oil and gas companies have been compiled for this CASS-PAK. Over 150 data items have been collected for each company, covering fiscal years 1981-90. Financial items include balance sheet, income statement and shareholder information. Operating data include refining operations, drilling, acreage and prices. Reserve recognition accounting information includes liquids, gas and BOE reserves, capitalized costs, costs incurred, oil and gas revenue accounting and standardized measure. Basic financial ratios such as return on assets and debt/equity have been calculated. Over 40 performance ratios have also been calculated, including finding costs, replacement ratios and plowback ratios. Historical data is also provided for over 30 predecessor companies which sold their reserves to, or merged with, one of the companies presented. Hard disk required.

OGJ300 Historical, 1983-90 CASS-PAK

Adapted from the *Oil & Gas Journal's* popular OGJ300 report, this CASS-PAK contains data for over 300 publicly-traded oil and gas companies with reserves in the U.S. (excluding limited partnerships and companies with less than three years of data). This historical version contains data from fiscal years 1983-90, allowing the user to view past trends and to forecast new ones. Data items include total assets, total revenue, net income, stockholders' equity, capital expenditures, current assets, current liabilities, long-term debt, total liabilities, oil and gas sales, oil and gas assets, number of shares, U.S. and worldwide liquids and gas production, reserves, net wells drilled, and key performance ratios. Hard disk required.

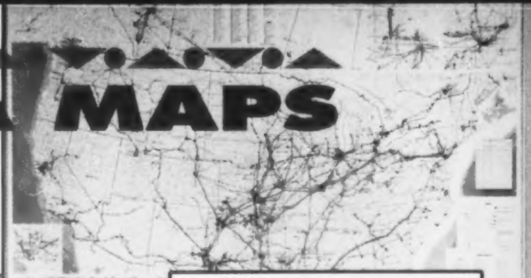
U.S./CANADA MAPS



Crude Oil Pipelines of the United States & Canada, 3rd Ed.

Now printed in seven colors with expanded Canadian coverage, the third edition of the Crude Oil Pipelines of the United States and Canada map features detailed insets of: Bakersfield, Chicago, Corpus Christi, Edmonton, Houston-Gulf Coast, Louisiana, Los Angeles, Montreal, the Permian Basin, San Francisco and Vancouver areas in addition to Alaska. A new inset of northern British Columbia and Alberta at the same scale as the main map completes the expanded coverage 116 pipeline operators, pipeline diameters, pump stations, and terminals are shown as before. Plus refinery locations are shown with operator and capacity. Refinery Shutdowns from 1982-1988 are depicted along with the year of closing, and operating capacities. Additional map features include: Latitude and longitude, National, State and Provincial boundaries and capitols; County boundaries and county seats, Federal offshore lease grids, the Continental Shelf, Slope and Rise, and Principal drainage.

Size: 40" X 57" Scale: 1:3,600,000 1" = 56.7 miles

BESTSELLER

Natural Gas Pipelines of the United States & Canada, 3rd Ed.

Completely revised and updated to include new information on U.S. and Canadian lines and to expand coverage. Printed in nine colors, Natural Gas Pipelines of the United States and Canada identifies 220 major natural gas pipeline systems. Each pipeline is numerically and color-coded to determine the operator. Valuable features include: pipe diameters in inches; compressor station locations; LNG Terminals; latitude and longitude lines; counties and county seats, state and provincial capitals; major river systems; and new larger Alaska inset. Special new features include: Federal offshore lease grids for U.S. offshore waters; local government boundaries for Canada. Mexican gas pipeline system, and bathymetric features.

Size: 40" X 57" Scale 1:3,600,000 1" = 56.7 miles

Products Pipelines of the United States & Canada, 2nd Ed.

Printed in seven colors, this completely revised map uses separate colors to show LPG and NGL pipelines, CO pipelines and refined product pipelines. New features include insets of the Houston-Gulf Coast Area, Baton Rouge-New Orleans Area, Los Angeles Area and Chicago Area at 1:500,000. Enlarged Eastern Pennsylvania-New Jersey Area, a northern Alberta extension, and special inset of Cook Inlet in Alaska complete the pipeline coverage. Locations of selected operation related gas processing plants, U.S. LP-Gas import terminals with operators and capacities. Petrochemical plants with operators. Refineries with operators and capacities. Light hydrocarbon storage facilities with operators and capacities, tanker ports and single point moorings with ownership and maximum tanker size and water depth supplement the already informative map showing pipelines, operators, diameters, pump stations, and terminals.
